

## NUBI 4.0 extra tamper accessory

NBTMPX

Anti foam sensor

### Advanced sensors

#### Shock sensor

Against attempts to remove the device or mechanically damage it.

#### Anti approach sensor

Detects if the device is touched with the hands.

#### Temperature sensor

Against attempts at tampering caused by flames or similar heat sources.

#### Anti foam sensor

Against attempts to obstruct the smoke outlet using expansion foams or similar products.

#### Main features:

- Professional protection against tampering.
- Compatible both with the version of NUBI 4.0 powered at 12V and with that powered by battery.
- Each protection function can be enabled individually.
- Independent alarm memory for each function.
- Automatically extends the 24H output of NUBI 4.0 to communicate tampering to the alarm control panel.

#### Ordering code:

**NBTMPX:** Extender tamper board with anti foam sensor.
