## Anti-theft smoke generator Wireless, Plug & Play version

The only real protection against burglars

*Nubi*  
4.0

MADE IN ITALY

When an attempted theft occurs, NUBI 4.0 creates an impenetrable smoke barrier that prevents people from seeing and therefore from stealing, leaving only the choice of escape to the intruders.

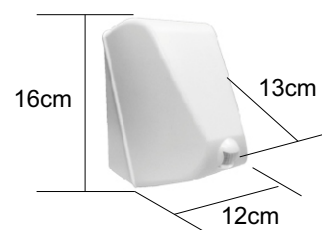

- 100% Compatible with any burglar system with an internal siren.
- Wireless, self-powered with 10-year battery life. It is installed with only two screws.
- Simple to program: press the pairing button and make the siren sound to record it
- Disposable smoke cartridge ideal for volumes up to 100m<sup>3</sup>
- Small size.
- Two different NUBI 4.0 shutdown logs:
  - 1 Always immediate when the sound of the siren goes off.
  - 2 Delayed by 5 minutes when the duration of the siren sound exceeds the recorded time, otherwise immediate.

①  
**The alarm sounds  
and NUBI is alerted**

②  
**NUBI detects  
a movement**

③  
**NUBI creates an impenetrable smoke barrier**

The internal siren must be in the same room where NUBI 4.0 is.  
After smoke dispensing, ventilate the rooms well before staying there.  
Installation near strong sound sources can shorten battery life.  
Only the siren paired at programming time is able to activate NUBI 4.0  
The product uses S25 pyrotechnic smoke cartridges produced in Italy by XAFER and distributed by Smartek srl.

CE

NUBI 4.0 is manufactured in Italy by Smartek srl - Corso Unione Sovietica 612/15C - 10135 Turin
